WE ARE PIONEERS WITH A VISION.

We thrive upon innovation designed to give you the ultimate feeling of mastery in your home and laundry care. We see your needs of today. And foresee the ones of tomorrow. So that you can achieve results that don't just meet your standards, but exceed them.

We believe in intelligent technology and exceptional performance, helping you to take anything you do at home to the next level, every day.

We are proud of our distinctive engineering and responsive design, guaranteeing you the performance you expect and deserve.

We are a brand that people turn to for intelligent and exciting new ways to guarantee their outcome.

This has been our passion for over 125 years, and continues to be our passion today.

We are AEG. And together with you, we are always an idea ahead.

Lifts gentle to a new level

The world's first ComfortLift® dishwasher means less bending down, to make your life more comfortable.

FLAVOUR CONDUCTED YOUR WAY.

The Mastery Range from AEG works with you in unique ways to take your cooking to the next level. Every appliance ready to play their part, working in harmony and instantly responding to your second-by-second commands.

Now, for the first time, you can even tell the oven how you want your dish cooked – using just the words you would in a restaurant – rare, medium, well done. Or play with a hob where the entire surface follows every pan you move, no matter how big or small. It's time to expect more from the way you cook. Step into the world's most responsive cooking experience.

Maestro, your kitchen is waiting.

REFRIGERATION

Flavour is all about freshness and storing ingredients – the right humidity and temperature is vital. But how do you want your fridge arranged?

Our solution lets you decide. Everything and anything fits in perfectly for long-lasting flavour, while maintaining energy efficiency, protecting your environment and your budget.

Our Zero Degree compartments make it possible to create different chilling conditions in each part of your refrigerator. Adjust each drawer's temperature at a touch.

IN THIS SECTION

Integrated Fridge Freezers	13–19
Integrated Fridges and Freezers	20–30
Freestanding Fridge Freezers	30–34
Freestanding Fridges and Freezers	34–37
Wine Cooling	38–41

ENERGY EFFICIENT

CUSTOMFLEX®

TWINTeCH®

PRECISION CHILLING.

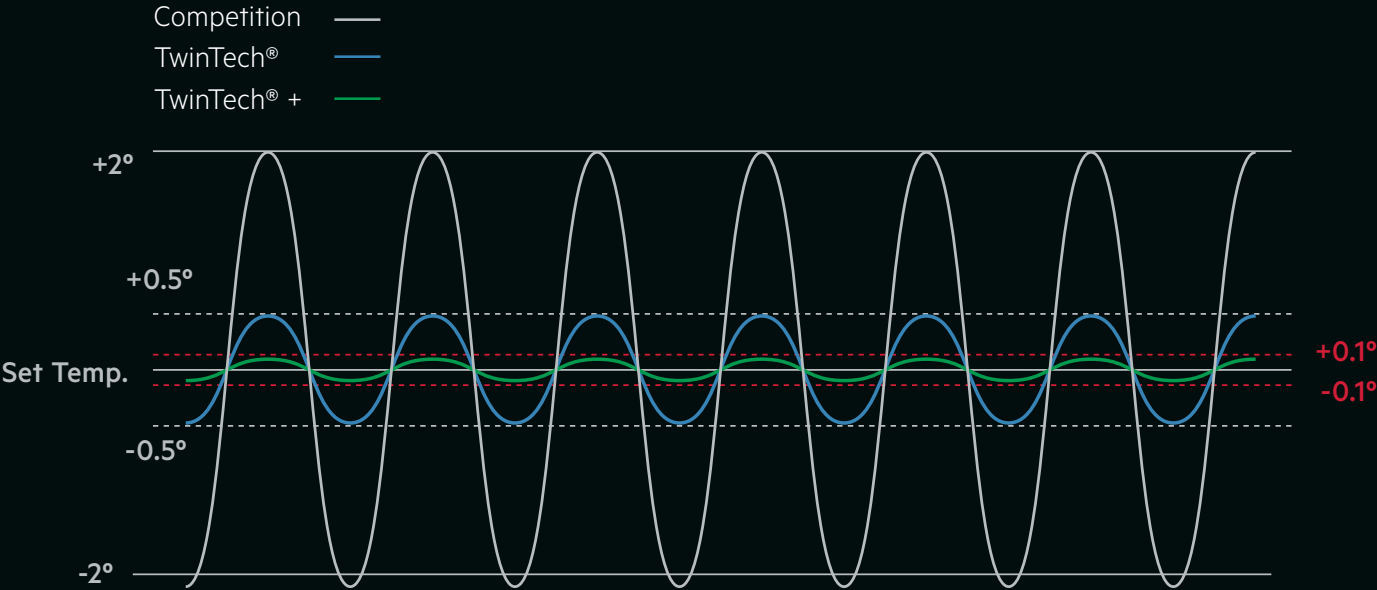

TwinTech®

Unlike conventional fridge freezers that use cold, ultra-dry air from the freezer and recirculate it to cool the fridge, TwinTech® units have two separate cooling systems. This provides the ideal humidity in each compartment, preventing food from drying out in the fridge and delivering frost-free storage in the freezer.

Energy Efficient

Did you know that our appliances are leaders in energy performance, with the highest ratings of up to A+++ -20% energy saving?

DynamicAir

DynamicAir technology maintains the airflow inside the fridge, ensuring consistent temperature at every shelf so that your ingredients stay fresh.

LowFrost/NoFrost

Never defrost your freezer again. NoFrost freezers also offer efficient and effective freezing with quicker, more even freezing for better food preservation.

Zero Degree

Our Zero Degree compartments make it possible to create different chilling conditions in each part of your refrigerator. Adjust each drawer's temperature at a touch.

ADAPTABLE FOR EVERY TASTE.

CustomFlex®

Create your own perfectly organised fridge with the CustomFlex® storage system. This unique and practical inner door allows you to arrange shelves, clips and compartments in all shapes and sizes in hundreds of different layouts, so there's always one that works best for you at any time.

LED Touch Display

Touch controls with new white LED digital display.

High Efficiency LED Lighting

High efficiency LED lighting ensures a good spread of light shines downwards in the fridge. An intelligent fan function prevents warm areas in the upper part of the fridge and creates an even temperature in all fridge levels.

Self-Closing Door

An elegant solution, with no risk of slamming. Automatically closes from an opening angle of 25–30 degrees.

A GUIDE TO REFRIGERATION ICONS

KEY FEATURES

TwinTech®

With the pioneering TwinTech® technology for exceptional freshness. One cooling system chills the freezer, keeping it NoFrost. The other cools the fridge, ensuring that the fridge temperature is cold, stable and with the correct level of humidity, so as not to dry out your fruit and vegetables.

Frostmatic

Ideal for freezing fresh food quickly, preserving the flavour, colour, texture and nutritional value.

Multi Air Flow

The Multi Air Flow technology provides the precise temperature and humidity your ingredients need to stay fresh in your fridge, nutritious and full of flavour for even longer.

CustomFlex®

Keeping all your fresh ingredients to hand is key to creating fresh, delicious dishes. Now the CustomFlex® refrigerator from AEG lets you organise your fridge storage just the way you want.

LCD Touch Display

Sleek touch controls that are intuitive and ready to use.

Ice & Water

Dispenser through the door for water and ice cubes.

Temperature Alarm

Highlights an increase in the temperature in the freezer compartment.

NoFrost

Never defrost your freezer again. NoFrost freezers offer efficient and effective freezing with quicker, more even freezing for better food preservation.

LowFrost

Faster, more efficient defrosting. Time is of the essence when defrosting your freezer. This fridge freezer comes with efficient LowFrost technology, which makes the defrosting faster and less frequent than ever before.

LongFresh

The LongFresh feature is a Zero Degree compartment with adjustable temperature settings and separate humidity. The two Zero Degree compartments in the AEG refrigerator allow you to choose and adjust the humidity and temperature settings in each drawer.

Touch Control

Intuitive touch controls provide instant feedback, are easy to use and look sleek in the kitchen.

Soft Close Doors

Soft Close door hinges that automatically close from an angle of 23–30 degrees – providing an elegant solution to slamming doors.

LED Lighting

Premium and modern lighting system in the fridge thanks to the bright LED light with rise-on effect.

Coolmatic

Ideal for chilling fresh food quickly and regaining a stable temperature within the fridge once the door has been opened, maintaining food freshness.

DynamicAir

DynamicAir technology maintains the airflow inside the fridge, ensuring a consistent temperature at every shelf so that your ingredients stay fresh.

UltraFresh+

Automatic humidity control and antioxidant release filter inside the fridge compartment, keeping fruit and vegetables market fresh.

MultiSpace

No compromise between kitchen dimensions and your storage requirements. More storage capacity than a standard built-in model for improved organisation and flexibility.

SpinView

SpinView the revolutionary solution for easy access to those hard to reach items. SpinView rotates with one touch in both directions, allowing full accessibility to the back of the shelf with minimum effort.

Simple Touch Controls

Our simple to use electronic controls, with Frostmatic function, ensure that you can set the fridge freezer to your desired temperature.

MultiSwitch

Fully convertible middle draw ranging from -18 to +7 degrees. Provides optimal environment for any type of food.

LongFresh

The LongFresh feature is a Zero Degree compartment with adjustable temperature settings and separate humidity. To maintain the deep blushing crimson of a fillet of beef, to ensure the sweet freshness of a lobster tail, or to hold the ultimate flavour of fresh fruit they must be treated and chilled with precision. The two Zero Degree compartments in the AEG refrigerator allow you to choose and adjust the humidity and temperature settings in each drawer. Ensure that each element is at peak condition, by chilling them in unique conditions.

WINE COOLING

Our Wine Cellar Range has dedicated technology for optimal wine storage, to store your wine bottles at the perfect temperature throughout the cooler.

Our wine cellars have a single temperature zone with a range of 5–20, providing the perfect environment for your wine. The UV protected glass door helps to protect your wine from light damage and our internal fan ensures a stable, consistent temperature.

Ovens

However you like to cook and whatever your favourite dishes, there’s an AEG oven that’s just right for you.

Featuring our intelligent technology, every oven makes it effortless and enjoyable to create great tasting food, exactly the way you like it.

IN THIS SECTION

Single Ovens	50–59
Double Ovens	60–63
Compacts	64–73
Microwave Ovens	74–76

STEAMBOOST

COMMAND
WHEEL OVEN
CONTROL

RARE, MEDIUM, WELL DONE. AT YOUR COMMAND.

Command Wheel

An innovative Command Wheel removes the need for a busy dashboard and makes the cooking experience simple and streamlined for perfection on a plate, every time.

The latest furniture trends are becoming more linear and we have designed our products in line with that. We've also included more glass and less stainless steel for a seamless finish.

SenseCook

By precisely measuring the core temperature of your food, the Food Sensor lets you know when your rare, medium or well done meat is ready. It also allows you to cook fish, casseroles and vegetables just the way you like them.

SurroundCook®

Expect even, every time with SurroundCook®. Every part of your dish receives the exact consistent heat that it needs.

Pyrolytic Self Cleaning

A total self-cleaning function that automatically locks the oven door and heats up to 500°C, turning food residue to ash.

STEAM. YOUR NEW STANDARD FOR FLAVOUR.

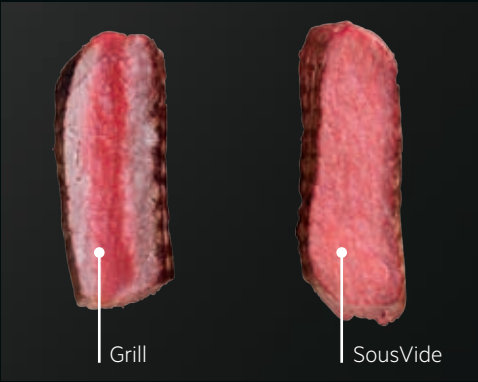

For maximum flavour, add steam.

By adding steam to traditional heat, our range of ovens ensure your dishes are cooked to your exact preference.

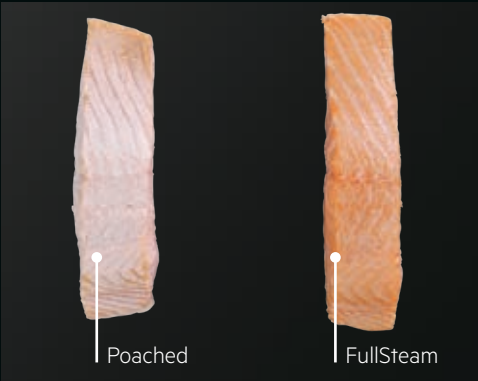

Why steam?

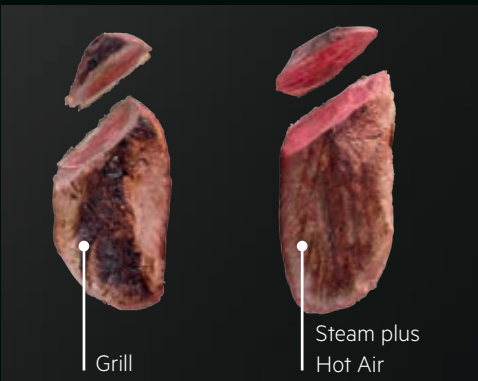

- **Food stays moist**
Prevents food from drying out.
- **Preservation**
Preserves nutrients, vitamins and minerals.
- **Evenly cooked**
Cooks food more evenly from surface to core.
- **More efficient**
Delivers heat more efficiently to the food than dry, hot air, so the temperature can be lower.

SteamPro
SteamPro with SousVide means you can create tastier and healthier dishes. Cook with absolute purity, sealing in all the aromas, taste and nutrients under vacuum, then applying gentle steam heat to cook delicious dishes.

SteamBoost
Turn flavour up to full, whether you are baking, roasting, poaching or steaming with SteamBoost. The right amount of steam locks in the natural moisture to deliver juicy and succulent dishes.

SteamCrisp
By combining steam and traditional heat, food is cooked gently from the outside to the centre, enhancing food taste and achieving better results. Perfect for all your favourite roasting and baking recipes.

A GUIDE TO COOKING ICONS

KEY FEATURES

SteamPro

Our SteamPro multifunctional ovens provide you with the SousVide function, a powerful tool that has been used by professional chefs for many years. They also include all of the benefits of our SteamBoost and SteamCrisp models.

SteamBoost

The introduction of steam makes all the difference, locking in the natural moisture to deliver a whole range of juicy and succulent dishes including meat, fish, casseroles and vegetables – even desserts. Our SteamBoost models have 3 levels of steam (humidity), low, medium and high.

SteamCrisp

By combining steam (to produce low humidity) and traditional heat in the Quarter steam programme, food is cooked gently from the outside to the centre, enhancing food taste and achieving better results. Perfect for cooking the Sunday roast.

SteamBake™

Adds a bit of steam for the right colour and crust, improving all of your baking results.

SurroundCook®

Hot air fan that circulates the air more effectively than a conventional oven so that your food gets evenly cooked anywhere in the oven.

SenseCook

Food sensor that adapts to what you are cooking and helps you get the results you are aiming for. Just tell the oven how you want your dish cooked and the oven will let you know once your food has reached the right temperature.

Multifunction

Multifunction ovens have all of the familiar cooking functions, including our extra large hot air fan.

Dual Multifunction

Both oven cavities are multifunctional, which means they have all of the traditional cooking functions including True Fan.

Command Wheel

The Command Wheel gives you an intuitive way to operate all the cooking settings. It swiftly responds to your actions so that you always have control of every step of the cooking process.

ProSight Touch Controls

Full-touch electronic control panel – simple to operate and beautifully designed.

Retractable Controls

High quality finish stainless steel retractable knobs.

Pyrolytic

With our Pyrolysis function, this self cleaning oven heats up to 500°C and turns food residue to ash.

CataFan

The Fan Cover has a special cleaning coating, activated at high temperature to remove grease from this hard to access area.

Soft Motion

Ensures a smooth and soundless door closing, delivering a good feeling, time after time.

Catalytic Liners

The catalytic lining absorbs the grease from cooking and is activated by regular heating to 220°C. The grease residue is oxidised leaving the catalytic surface clean.

Enamel Liners

Ultra smooth enamel interior that results in easy cleaning.

XXL

All of our single ovens have an extra large capacity, allowing you to cook on all 5 levels simultaneously.

Telescopic Runners

Allows you to pull the shelves smoothly out of the oven. This enables you to efficiently and safely access the contents of your oven.

Fully Programmable

Precise timer that switches off the oven when you want. Ideal for dishes with a long cooking process.

3 Vacuum Settings

Seal your food under a range of air extraction levels, from 50% – 99% efficiency, ensuring that marinades don't leak from the bag and that no unnecessary air enters it.

Non-Vented Installation

Self ventilating microwaves allow for more flexibility when installing.

800w Quartz Grill

Flexible cooking, thanks to microwave functions and integrated quartz grill.

FUNCTIONS

SousVide Cooking

SousVide cooking is an old cooking technology used by professional chefs to cook vacuum packed food slowly at a low, accurately controlled temperature.

Full Steam

The SteamBoost oven with Full Steam function makes more of the flavours within your food. Combining all traditional oven functions with the added benefit of steam.

Humidity High

Suitable for cooking delicate dishes like custards, flans, terrines and fish.

Humidity Medium

This function is suitable for cooking stewed and braised meat as well as bread and sweet yeast dough. Due to the combination of steam and heat the meat gets a juicy and tender texture and yeast dough bakes get a crispy and shiny surface.

Humidity Low

Suitable for meat, poultry, oven dishes and casseroles. Thanks to the combination of 25% steam and 75% heat, meat gets a tender and juicy texture along with a crusty surface.

True Fan Cooking

Our True Fan Cooking system gently circulates hot air through the oven cavity. As the oven heats up faster, lower temperatures and shorter cooking times are used to achieve delicious results.

Conventional Cooking

Top and bottom elements heat the oven, providing traditional cooking on one shelf position, which is ideal for baking breads or fruitcakes.

Au Gratin

For dishes such as lasagne or potato gratin.

Bottom Heat

Oven is heated by the bottom element only. Food is gently reheated, ideal for pies and pastries, as it keeps the pastry crisp.

Turbo Grilling

Heat from the top element is circulated by the fan, sealing and crisping the food.

Grilling

Fully controllable powerful grill, ideal for family-sized portions of food.

Steam Assisted Fan Cooking

An improved version of the traditional True Fan cooking, combining steam with an extra large hot air fan.

Pizza Setting

Designed to ensure pastry bases, quiches and pizzas are cooked to your taste.

Moist Fan Baking

Retains moisture within the oven, thus achieving light fluffy results whilst using the oven in an energy efficient way.

Slow Cooking

Two slow cook options, dependent on the quantity of food being cooked. Low temperature combined with patience will guarantee a good result.

Defrost

Defrost your frozen food gently in half the usual time. Hot air is quickly circulated inside the oven cavity.

Fast Grilling

Combining grill, fan and bottom heat to efficiently produce delicious dishes. Excellent on semi-processed food such as chips and spring rolls.

Bread Baking

Optimum temperature and environment for baking yeast mixtures. Using radiant heat and steam to bake a variety of loaves to your taste.

Dough Proving

Creates the perfect environment to assist bread baking by proving your yeast mixture correctly.

Eco Roasting

Economical setting for roasting large joints or poultry. Simply select the appropriate cooking time depending on the weight of the food, and the oven automatically switches off once the cooking is complete.

Pyrolysis

A total self-cleaning function that heats up to 500°C and turns food residue to ash.

Quarter Steam & Heat

25% steam and 75% heat locks in moisture and browns the outside for irresistible flavours.

Microwave & Grill

Combines traditional microwave and grill functions.

Defrost by Weight

Provides ease of use with defrosting, just select the food type and weight and the oven does the rest.

Auto Favourite

The Auto favourite function has 3 pre-set functions: Soften Butter, Melt Chocolate and Mug Cake. You can overwrite these with your favourite recipes.

Child Lock

Setting the child lock function will prevent your little ones from switching on the oven.

SINGLE OVENS

SteamPro, with SousVide allows you to create tastier and healthier dishes. Cook with absolute purity, sealing in all the aromas, taste and nutrients under vacuum, then applying gentle steam heat to cook delicious dishes.

Vac Sealer

The AEG vacuum sealer drawer helps you to be a SousVide pro chef at home, by sealing in the flavour, moisture and nutrients of ingredients allowing you to cook them to perfection.

COMPACT RANGE

With our widest range of high performance appliances, you can mix and match everything you want – the way you want – and it all aligns beautifully with a single, stylish design.

The Compact range also fits perfectly with our full size appliances.

Square Alignment Compacts

Create your ideal kitchen in a combination to suit your needs. By grouping your compact appliances in a cluster, a column or a sleek horizontal run you create your own, individual look.

Horizontal Alignment Oven and Compacts

Compact Appliance, Warming Drawer or Vac sealer and an AEG Single Oven.

Horizontal Alignment Compacts

Two compact appliances with two warming drawers or vacuum sealers.

Vertical Alignment Oven and Compact

Compact above an AEG single oven.

COMPACTS

However you like to create in the kitchen, we have a Compact appliance to suit your needs.

Whether you want to roast, bake, grill, microwave or cook with steam, our high performance ovens and vacuum sealer drawers ensure you can serve great tasting dishes every time.

The combination of drawers with our Compact range match those of our full-size ovens, so you don't need to compromise.

HOBS

At AEG we believe that a hob should look as good as it performs. Which is why all our induction hobs are designed not just to bring out the best in your cooking, but also to give you the flexibility you need while cooking and look fantastic in your kitchen.

IN THIS SECTION

Induction Hobs	84–90
Combo Hobs	91
Ceramic Hobs	92–94
Gas Hobs	96–102
Mixed Fuel Hobs	103

MAKE BOILING OVER A THING OF THE PAST.

SenseBoil™

The boil-to-simmer function automatically adjusts temperature settings, reducing rising bubbles to a controlled simmer. Nothing boiling over the side. No spillages on the surface of the hob. Saving the time and energy it takes to get unrivalled results.

WITHOUT SENSEBOIL™
INDUCTION HOB

WITH SENSEBOIL™
INDUCTION HOB

Pure Black Design

Aligns perfectly with every kitchen style to match the clean design of your kitchen. This hob has a unique, pure black surface – with absolutely no markings apart from a subtle on/off button.

Slim Installation

The slim, space-saving design embeds into a work surface of any depth, even with a drawer below.

A GUIDE TO HOB ICONS

KEY FEATURES

ActiveTouch

The user interface is not visible until a pan is placed on the hob. The user interface contains DirekTouch for instant heat control with one touch, minute minder and auto bridge.

Touch Control

Efficient touch controls enable you to set the hob's heat level precisely, while its flat surface is easy to clean.

DirekTouch Slider

This hob's direct-access heat controls enable you to switch directly to exactly the right temperature with one touch. Simply touch the correct level on the slide control.

Rotary DirekTouch

The DirekTouch function allows you to switch to the exact right temperature with one touch.

Rotary

Classic rotary control knobs.

MaxiSense®

The MaxiSense® induction hob has self-sizing cooking zones. Each zone detects the size and shape of the pan you're using, however large or small.

FlexiBridge

A multi-purpose zone that allows you to customise your own cooking area, combining up to 4 segments with a consistent and even heat distribution.

Double Bridge

Two zones can be paired at the touch of a button, providing a single bridge for cooking. It's optimised for using large pots and pans by automatically aligning to share both temperature and time settings.

PowerSlide

From boiling to simmering to keeping warm. When you need repeated quick heat changes to create a dish, simply slide your pan from heat to heat.

SenseBoil™

When you first boil your water, a special sensor under the glass automatically reduces the heat to prevent overboiling and keep the water simmering until you are ready to add your ingredients to the pan.

Hob²Hood

Hob²Hood automatically turns on your cooker hood and lights when you start using the hob. The cooker hood will adjust according to the cooking levels on the induction zones.

Pure Black Design

Unique hob with pure black design. The hob controls and cooking zones are visible only when needed. When not in use, the surface is clean black, nothing to disturb the kitchen design.

Cast Iron Supports

Cast iron pan supports provide a robust and durable cooking support with professional design. Safe, long lasting and easy to clean.

Extendable Zone

Extendable zone, optimised for cooking with a wide range of pot sizes.

Slim Installation

AEG induction hobs have the slimmest platform on the market, allowing a worktop as thin as 28mm with an oven beneath the hob.

Easy Installation

Our Optifix™ spring system is self-installing and self-centring. Simply place the hob into your cut out.

TripleZone

Triple extendable zone, optimised for cooking with a wide range of pot sizes.

KEY FEATURES

Easy Clean

Because the surface around the pans stays cool as you cook, you can get rid of spills as you go along. Nothing gets burnt on and there's nowhere for dirt to hide.

Minute Minder

Perfect cooking results guaranteed by setting the cooking time length and the acoustic signal lets you know it has finished.

Auto Ignition

Total control of the ignition through a single-handed operation of turning the knob to automatically light the hob.

Flush Burner

Flush Burners are easy to remove and dishwasher safe, ensuring that cleaning the hob is as simple as possible.

Vertical Flame

Vertical Flame ensures the heat is evenly distributed on the bottom of the pan, making it 20% more efficient than standard burners.

Single Bridge

Two zones can be paired at the touch of a button, providing a single bridge for cooking. By automatically aligning to share both temperature and time settings, it's optimised for using large pots and pans at once.

FUNCTIONS

Cook Assist

An innovative assisted cooking function. Select the dish and the desired result – rare, medium, well-done – to ensure consistent frying.

Count-Up Timer

Set a reminder or use the count-up timer to keep in control of your cooking.

Minute Minder

Each induction cooking zone has an independent 99 minute timer. The timer will switch the zone off after the time has elapsed.

Eco Timer

Energy saving timer that switches off the zone and uses residual heat to complete the last few minutes of cooking.

Zone Booster

Power booster function to reach high temperatures extra fast.

AutoMax

The hob will apply full output of heat at the beginning, before automatically dropping to the required setting.

Pan Detection

The user interface is not visible until a pan is placed on the hob.

Auto Off

Safety mechanism that turns off the hob after a given time, depending on the selected heat setting.

Melting

A gentle melting function, perfect for chocolate or butter.

Burners

Number of burners.

Wok Burner

Extra large burner designed for a large wok.

Stop & Go

A function that reduces all zones in operation to a 'keep warm' setting.

HOBS

The PURE3 MaxiSense® Hob combines a flat, seamless design with interactive functions.

Imagine a glossy sheet of pure ebony glass. Add backlit touch controls and cooking zones, only coming to life when you turn them on.

It's the ultimate induction hob for the modern kitchen.

Plancha Grill

Turn your hob to a barbecue in an instant and get perfect grill taste all year round with the Plancha Grill. Heat is distributed fast and consistently across the plate, ensuring all ingredients are grilled evenly wherever you place them. Now you can grill steaks to perfection!

GAS COOKING WITH ABSOLUTE ASSURANCE.

FlameLight

FlameLight LED indicators tell you if a burner is turned on or off. And residual heat indicators show whether pan supports are still hot after use.

Cast Iron Supports

Cast iron pan supports provide a robust and durable cooking support with professional design. Safe, long lasting and easy to clean.

Hob²Hood

The AEG Hob²Hood adapts to your cooking to keep your kitchen free of steam and vapours automatically.

FREESTANDING COOKING

However you like to cook and whatever your favourite dishes are, there's an AEG oven that's right for you.

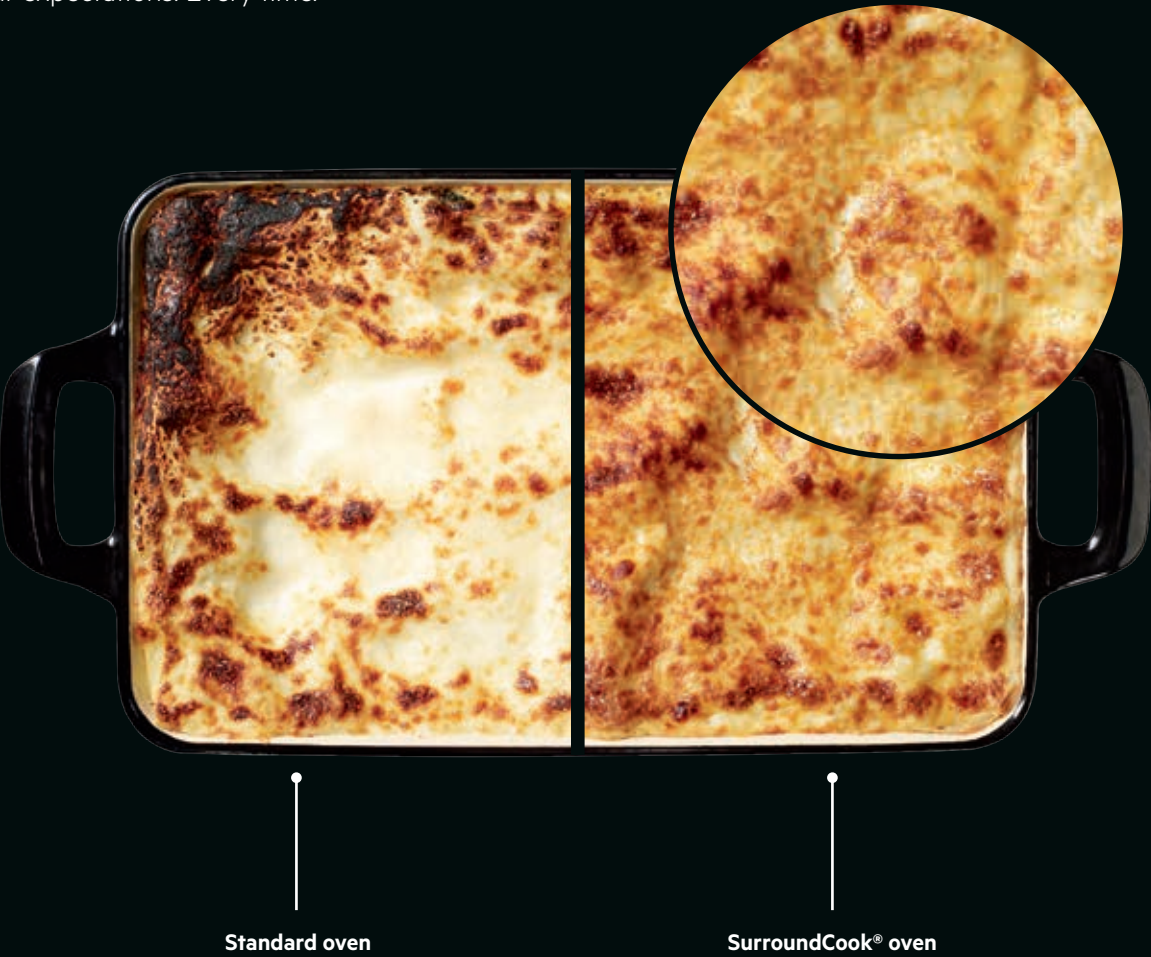

Featuring our intelligent technology, every oven makes it effortless and enjoyable to create great tasting food, exactly the way you like it.

PERFECT COMBINATION IN YOUR KITCHEN

SurroundCook®

Unlike standard cookers, the AEG SurroundCook® oven's advanced fan technology ensures that every part of your dish gets exactly the heat it needs. Evenly. Consistently. Wherever it's placed. Whether it's one dish or several. No more turning dishes halfway through cooking. Just the results that meet your expectations. Every time.

SteamBake™

The SteamBake™ function adds the right amount of humidity at the start of the cooking process, allowing for better dough texture, greater rise and the perfect crust – resulting in great tasting baking results every time.

Food Sensor

By precisely measuring the core temperature of your food, the food sensor lets you know when the desired temperature has been achieved. Once it hits the required temperature, an alarm will sound and the oven will switch off automatically.

Catalytic Self Cleaning

Our cookers with catalytic cleaning features include a special catalytic enamel cooker lining. This helps to burn off food residue and grease when the cooker is hot – keeping the cooker clean even while you are cooking.

A GUIDE TO COOKING ICONS

KEY FEATURES

SurroundCook®

Hot air fan that circulates the air more effectively than a conventional oven so that your food gets evenly cooked anywhere in the oven.

Catalytic Liners

The catalytic lining absorbs the grease from cooking and is activated by regular heating to 220°C. The grease residue is oxidised leaving the catalytic surface clean.

Dual Multifunction

Both oven cavities are multifunctional, meaning that they have all of the traditional cooking functions including True Fan.

Telescopic Runners

Allows you to pull the shelves smoothly out of the oven. This enables safe and easy access to the contents of your oven.

Fully Programmable

Precise timer that switches off the oven at the time you require. Ideal for dishes with a long cooking process.

XXL

All of our single ovens have an extra large capacity, allowing you to cook on all 5 levels simultaneously.

SteamBake™

Adds a bit of steam for the right colour and crust, improving all of your baking results.

SenseCook

Food sensor that adapts to what you are cooking and helps you get the results you are aiming for. Just tell the oven how you want your dish cooked and the oven will let you know once your food has reached the right temperature.

Minute Minder

Perfect cooking results guaranteed by setting the cooking time length, with an acoustic signal to let you know it has finished.

Cast Iron Supports

Cast iron pan supports provide a robust and durable cooking support with professional design. Safe, long lasting and easy to clean.

MaxiSense®

The MaxiSense® induction hob has self-sizing cooking zones. Each zone detects the size and shape of the pan you're using, however large or small.

FUNCTIONS

Stop & Go

A function that reduces all zones in operation to a 'keep warm' setting.

Conventional Cooking

Top and bottom elements heat the oven, providing traditional cooking on one shelf position, which is ideal for baking breads or fruitcakes.

Bottom Heat

Oven is heated by the bottom element only. Food is gently reheated, ideal for pies and pastries as it keeps the pastry crisp.

Defrost

Defrost your frozen food gently in half the usual time. Hot air is quickly circulated inside the oven cavity.

Steam Baking

Adds a bit of steam for the right colour and crust, improving all of your baking results.

Residual heat indicators

Once a hob zone is turned off a light will illuminate on the control knob to indicate the zone is still hot. The light will switch off after a period of time.

Fast Heat Up Zones

The hob zone will reach the required temperature in 10 seconds.

AutoMax

The hob will apply full output of heat at the beginning, before automatically dropping to the required setting.

Fast Grilling

Combining grill, fan and bottom heat to efficiently produce delicious dishes. Excellent on semi-processed food such as chips and spring rolls.

Turbo Grilling

Heat from the top element is circulated by the fan, sealing and crisping the food.

Slow Cooking

Two slow cook options, depending on the quantity of food being cooked. Low temperature combined with patience will guarantee a good result.

Au Gratin

For dishes such as lasagne or potato gratin.

1 Rapid and 3 Semi-rapid Burners

Differing power levels offer the flexibility to bring liquid to the boil rapidly or simply to simmer.

4 Zones With 3 Power Levels

The four zone hob comes in a variety of power range setting for flexible cooking.

True Fan Cooking

Our true fan cooking system gently circulates hot air through the oven cavity. As the oven heats up faster, lower temperatures and shorter cooking times are used to achieve those delicious results.

Pizza Setting

Designed to ensure pastry bases, quiches and pizzas are cooked to your taste.

Minute Minder

Each induction cooking zone has an independent 99 minute timer. The timer will switch the zone off after the time has elapsed.

Moist Fan Baking

Retains moisture within the oven, thus achieving light fluffy results whilst using the oven in an energy efficient way.

4 Hob Burners in 3 Sizes

The gas hob has a variety of burners to adapt to different saucepan sizes and contents.

FREESTANDING COOKING

Our MaxiSense® induction hob has four zones in three sizes, with a wide range of power levels, ensuring fast, efficient and responsive cooking.

SteamBake™

The SteamBake™ function adds steam to the beginning of the cooking process to improve your baking results.

HOODS

Our cooking environments need to be fresh, bright and peaceful, enriching the time that we spend there. We use advanced technology to ensure that the design and build of our cooker hoods give you the optimum combination of high-end design and powerful functionality.

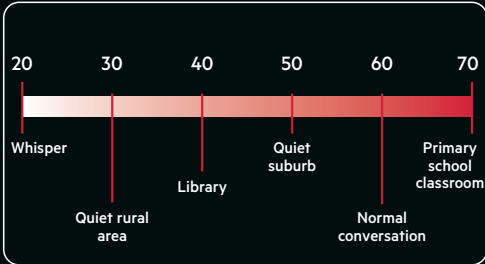

A FRESHER KITCHEN, HANDS FREE.

Hob²Hood

The AEG Hob²Hood adapts to your cooking to keep your kitchen free of steam and vapours without you even having to touch it.

As you cook, the hood activates automatically, monitoring the fluctuating heat and steam of every simmer and boil, effortlessly maintaining the freshness of your kitchen. Your attention stays, as it should, on preparing, finessing and enjoying your dish.

SilenceTech

Our advanced hood technology allows Cooker Hoods to extract at a low 54dB, allowing you to enjoy the full cooking experience without loud sounds from your appliance.

Breeze Function

The breeze function quietly refreshes the air in your kitchen to create a more enjoyable atmosphere to relax or entertain. This function will automatically switch off for your convenience.

LED Lighting

Provides the possibility to adjust the intensity of the light according to your needs, creating the perfect ambient illumination in your kitchen.

HOODS

Aligned across our range, your choice of hood will integrate seamlessly with any of our hob models. Our top line models feature our signature flow line for design harmony, together with a sophisticated white LED display on layered glass and metal.

A GUIDE TO HOOD ICONS

KEY FEATURES

Hob²Hood

A wireless function that, when paired with suitable hobs, automatically activates and regulates the cooker hood according to your cooking needs. It provides a fresher kitchen environment so you can focus on achieving great taste.

Touch on Glass Controls

Smooth and precise control of all your hood's functions with a simple touch on glass – easy to use and easy to clean.

Push Button Controls

Precise control of the setting levels is achieved via the squared push buttons.

Designer Filter Cover

High filter efficiency combined with perfect stainless steel designed filter covers – the perfect look and easy to clean in the dishwasher.

LED Lighting

LED lighting enables excellent visibility during the entire cooking process by providing ambient lighting in the kitchen.

Dimmable LED Lighting

Crisp bright illumination, or a gentle glow? Dimmer-controlled LED lighting means you can adjust the effect at the touch of a fingertip.

Black Glass

Beautiful design with unique black glass.

Stainless Steel

The anti fingerprint stainless steel finishing protects the surface of your cooker hood from fingerprints.

Stainless Steel with Glass

Perfect combination of stainless steel and glass to create a unique and professional style in your kitchen.

FUNCTIONS

Fan Speeds

Number of fan speeds, allowing you to adjust the power, noise and energy consumption.

SilenceTech

Reduces the noise level down to the lowest number of decibels allowing you to cook peacefully and enjoy all your favourite food without annoying sounds from the appliance.

Breeze Function

Refreshes the air in your kitchen after cooking at a very low noise level so that you have a more enjoyable and quiet atmosphere to relax or entertain.

Extendable to 80cm

An innovative addition that allows you to expand your hood from 60 cm to 80 cm.

DISHWASHERS

It's not just about the food – the style of cutlery and plates affect our perceptions of what we eat. A dark chocolate dish looks best when served on an angular plate, while a round plate is better for cheesecake. So you need a range of tableware that complements your food presentation and can be cared for in the most efficient way.

IN THIS SECTION

Fully Integrated Dishwashers	135–138
Semi-Integrated Dishwashers	139
Slimline Built-In Dishwashers	140

COMFORTLIFT®

AIRDRY TECHNOLOGY

LIFTS GENTLE TO A NEW LEVEL.

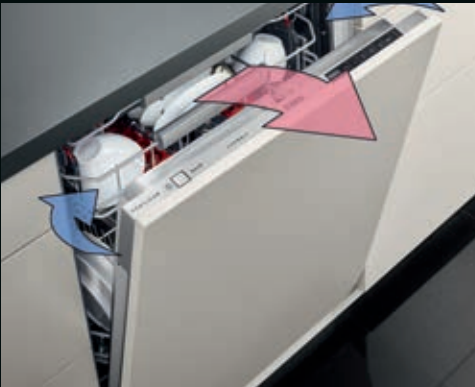

ComfortLift®

The ComfortLift® dishwasher is the first of its kind to gently slide the lower basket up for easy, ergonomic loading and unloading. That means less bending down, to make your life more comfortable.

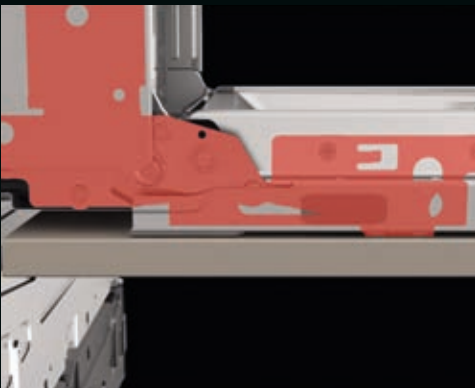

QuickSelect

An intuitive slider lets you control your dishwasher on your own terms. Simple, premium control that adapts the wash according to your lifestyle, allowing you to select when you want your dishes clean. The machine does the rest.

AirDry Technology

Uses natural airflow to finish the drying. By automatically opening the door by 10cm in the last part of the cycle, you will get maximum drying performance while effectively reducing your energy costs – leaving your dishes spotless.

Sliding Hinges

Allows you to install the dishwasher with any door length without the need to cut the kitchen plinth. This is also suitable for plinthless kitchens. The best solution on the market – patented by AEG.

SUPERIOR CLEANING AND FULL COVERAGE.

With our ProClean range of dishwashers we deliver superior cleaning and drying. Ensuring that you can clean more at the same time, get a great cleaning result with superb drying.

Satellite Spray Arms

The multiple double rotation of the Satellite Spray Arm sprays from continuously varying angles, leaving your dishes and cookware gleaming.

Standard spray arm coverage

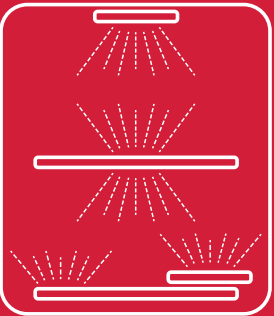

versus

Satellite spray arm coverage

5 Spray Levels

Multi level spray reaches every item anywhere, giving you our most efficient spray coverage.

Glass Care Programme

Special 45°C glass programme ensures perfect washing results while protecting your most precious glass, crystal and china.

XXL Interiors

The XXL interior of this dishwasher gives you an additional 10 litres of space – more capacity for those irregular shaped items.

Removable Cutlery Tray

Take your tray with you to the kitchen cutlery drawer for easy unloading. Best in class solutions for easy loading and unloading.

	Standard Models	ProClean	Benefits
Internal Space	Suitable for plate sizes up to 31cm diameter	Suitable for plate sizes up to 33cm diameter	Fit more in!
Spray Levels	2 – 3	5	More spray levels for better cleaning.
Satellite Spray Arm	Selected models	Included as standard	Sprays from continuously varying angles and covers a lot more area compared to a standard spray arm.
Ceiling Spray Arm	Selected models	Included as standard	More spray levels for better cleaning
GlassCare Package	Selected models (SoftSpikes only)	Full package included as standard	Protects delicate glasses with soft grips, soft spikes and a dedicated glass programme. No more hand washing old and fragile glass.

A GUIDE TO DISHWASHER ICONS

KEY FEATURES

ComfortLift®

The ComfortLift® basket rises on special hinges, ensuring less bending when loading and unloading dishes.

QuickSelect

Simple, premium control that adapts the wash according to your needs, allowing you to select when you want your dishes clean.

TimeBeam

Keeps you informed on the progress of the programme by projecting the remaining time on the floor.

XXL Interior

The XXL interior of this dishwasher gives you an additional 10 litres of space, more capacity for those irregular shaped items and plates up to 33cm in diameter.

Light Beam

This dishwasher is so quiet it projects a tiny red or green beam on to the floor to tell you when it's running and when it's finished.

Double Fulcrum Hinge

For ease of installation, the hinge on this model rises over the plinth level when the door is opened, so no need to cut the plinth.

SprayZone

Heavily soiled items, such as lasagne or crumble dishes, can be washed with a normal load by selecting the SprayZone option.

GlassCare Package

Delicate wine glasses are protected with our soft spikes, soft grips and dedicated GlassCare 45°C programme.

InteriorLight

Locate items at a glance thanks to the bright internal light.

TimeSaver Function

50% less time thanks to increased power speed and water pressure.

AirDry

Uses natural airflow to finish the drying. By automatically opening the door by 10cm in the last part of the cycle, you will get maximum drying performance leaving your dishes spotless.

Deluxe Interior

Selected models have a higher level of internal finish, including stainless steel drawer handles and knife supports in the cutlery drawer.

Removable Cutlery Drawer

Take your tray with you to the kitchen cutlery drawer for easy unloading. Best in class solutions for easy loading and unloading.

ProClean

Our ProClean models have a larger usable internal space, combined with five spray levels, satellite and ceiling spray arm plus GlassCare package.

24 Hour Time Delay

Run your dishwasher when it suits you, thanks to the up to 24 hour delay start function.

Sliding Hinge

With this dishwasher you can choose to install it normally above a plinth. Alternatively, the sliding hinge is perfect for plinthless kitchens or for installation above a small cupboard.

FlexiSpray

The combination of four spray levels and lower satellite spray arm ensures superior cleaning levels.

DISHWASHERS

The AEG range of dishwashers is designed to meet the frustrations and needs of dishwasher users. The models are designed to give a better quality wash and superb drying results, combined with a larger capacity and useful features such as our glasscare package which looks after your best wine glasses.

LAUNDRY

Imagine putting your precious sweater in the washer. Imagine trusting a dryer with a silk dress.

We’ve not only imagined it, we’ve done it. Washed the black dress time after time. Dried a soft wool sweater over and over. Every time they emerge without shrinking or fading, still vibrant and soft. Because AEG has redefined what a washer and dryer are. Protectors of fabric. Defenders of colour. Guardians of fibres.

Unprecedented care for the life of your clothes. Imagine that.

IN THIS SECTION

Washing Machines	158–163
Tumble Dryers	164–175
Washer Dryers	176–181

DESIGNED WITH CARE.

Our unique, innovative design is more than a pretty face. It also conveys superior quality and technical advancement. For our new range, we increased the size of the door and porthole for ease of use and a modern look, and reinvented the control panel.

Premium Design

Inspired by the electric turbines manufactured at the AEG Turbine Factory in Berlin. The positioning of the door handle at 2 o'clock makes it easy to open.

Easy to Use Control Panel

A simplified programme choice with only your 10 favourite and most often used programmes.

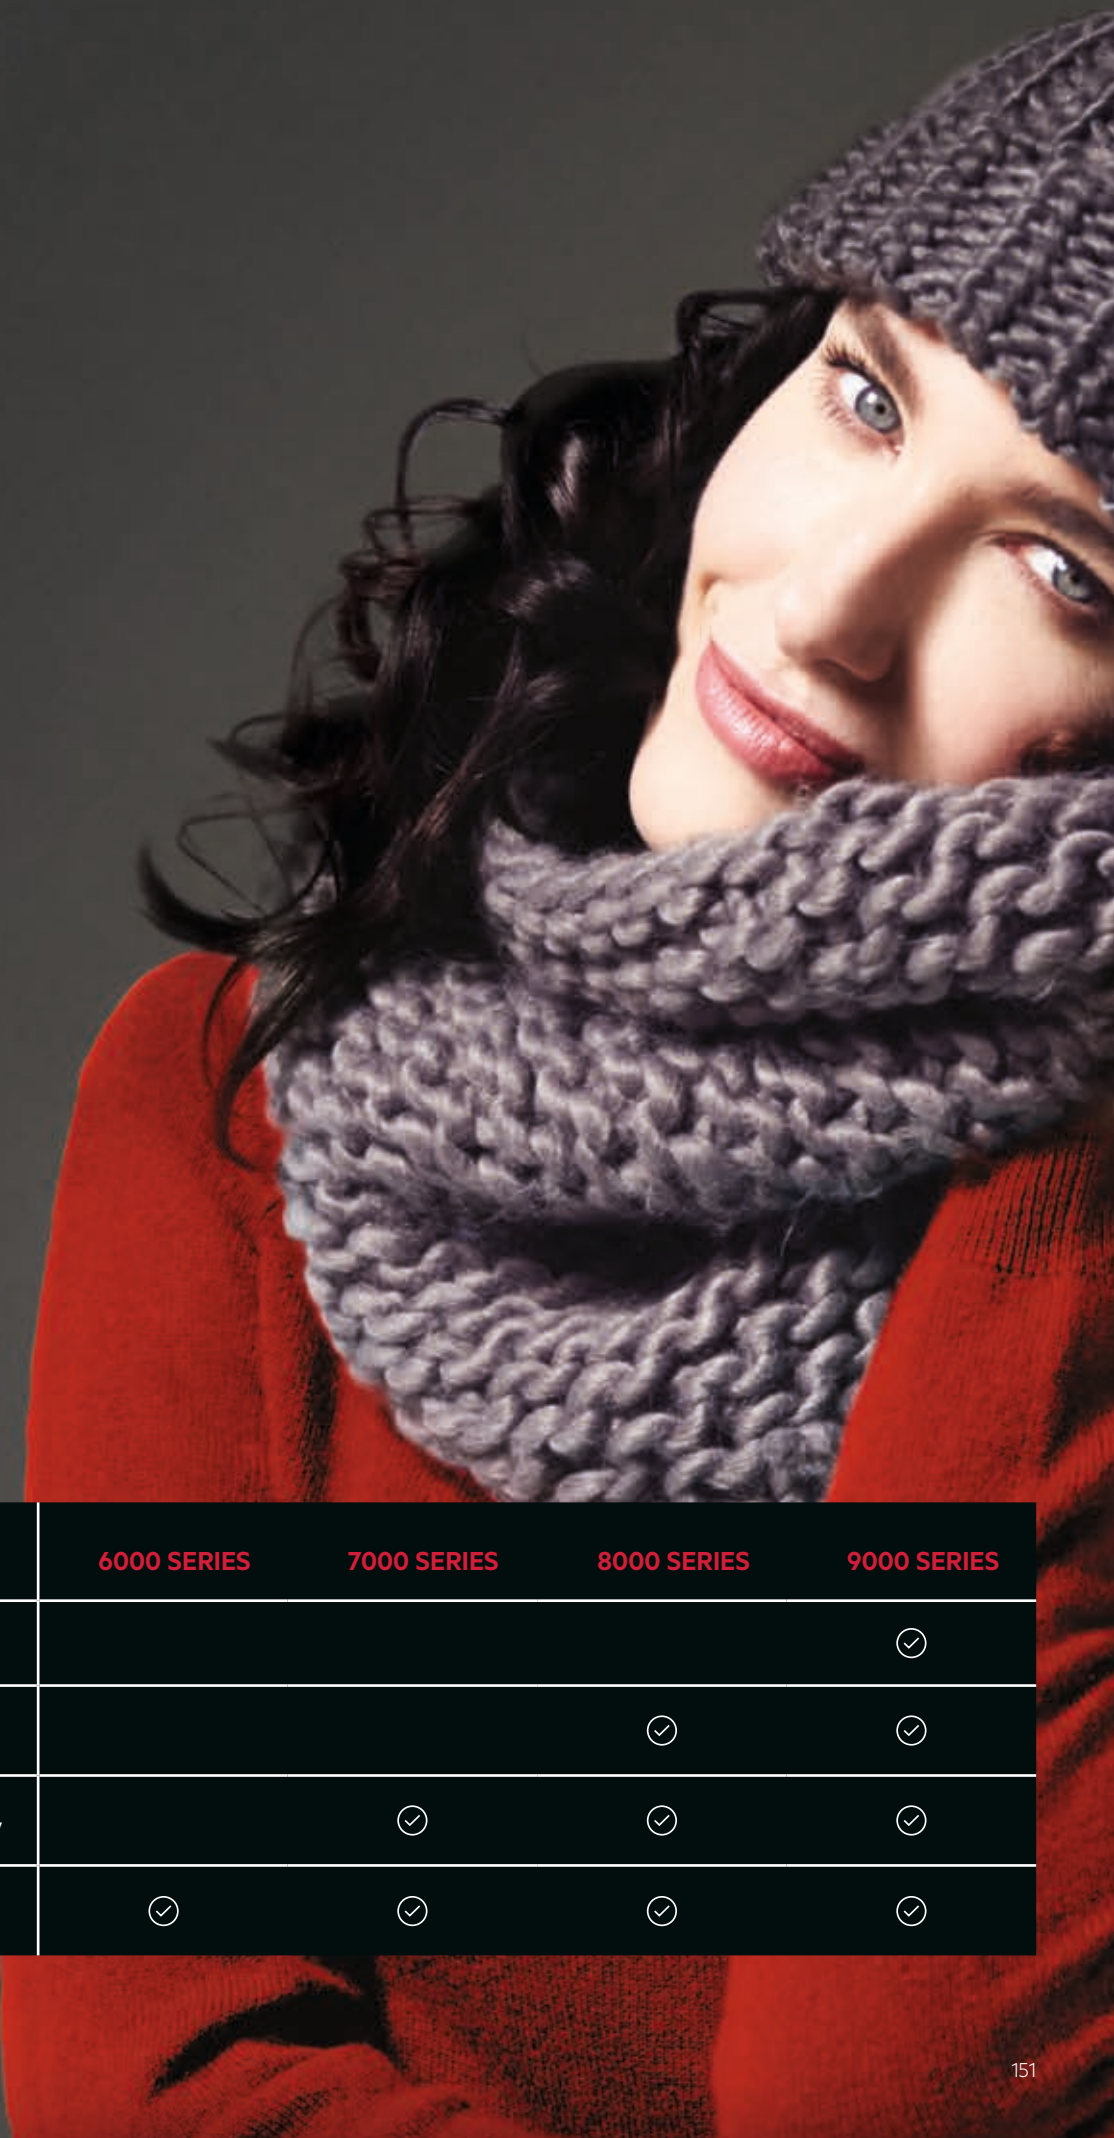

Complementary Design

AEG tumble dryers are designed to complement our washing machines and are available with stacking kits.

OUR WASHING MACHINE RANGE

Our washing machine range is structured into 4 series levels. As you go up the series, our washing machines step up in the level of fabric care, and include all the technologies from the series below.

	6000 SERIES	7000 SERIES	8000 SERIES	9000 SERIES
 SoftWater Technology				
 ÖKOMix Technology				
 ProSteam® Technology				
 ProSense® Technology				

NO FADING, WASH AFTER WASH.*

SoftWater Technology

Thanks to its SoftWater Technology, the 9000 series AEG washing machine is kinder to your clothes, keeping fabrics feeling soft and in-shape whilst also preserving colours and preventing fading.

All mains water contains minerals that can be harsh on fabrics. These AEG washing machines are the first in the world with SoftWater Technology to remove these impurities.

Available on 9000 series washing machines.

*Even after 50 washes, colours will keep their intensity and black won't fade to grey. Test for colourfastness performed on black polyester after 50 washing cycles at 30°C.

PRECISION DOSAGE. PRECISION CARE.

AutoDose Technology

Intelligent technology senses the weight of the load and automatically calculates the optimal amount of detergent and softener to add to each wash cycle. Ensuring your whites stay bright and colours keep their vitality, wash after wash.

Experience customised care by connecting laundry appliances to the My AEG Care app and utilise AEG expertise from anywhere. Set tailored programmes remotely, get cycle recommendations for your garments and receive notifications when your laundry is ready. Custom laundry care at your fingertips.

EVERY FIBRE PROTECTED.

ÖKOMix Technology

In other washing machines, less than half of the fibres are reached by fabric softeners.

But not in an ÖKOMix washing machine. By blending detergent and softener with water before they enter the drum, ÖKOMix Technology dissolves them completely, activating them to their full potential so that every fibre is expertly protected.

The 8000 Series introduces the new ÖKOPower programme – a 59 minute washing programme that delivers fantastic results, whilst using the minimal amount of energy. Thanks to the ÖKOMix Technology, detergent is activated fully and cleaning starts immediately. With the ÖKOPower programme, you can load up to 5kg of laundry.

Available on 9000 and 8000 series washing machines.

CUTS THE CREASES BY ONE THIRD.*

ProSteam® Technology

Using the PlusSteam® option to end a washing cycle with steam, reduces creasing by up to 30%. You can also refresh clothes with a separate steam programme to remove unwanted odours from garments.

That means less time ironing, less dry cleaning, less wear and tear on fibres. Sharp results with a fraction of the usual effort.

Available on 9000, 8000 and 7000 series washing machines.

Standard cottons programme without PlusSteam®.

*Comparative test using a standard cottons programme without selecting the PlusSteam® option versus the same programme with the PlusSteam® option selected.

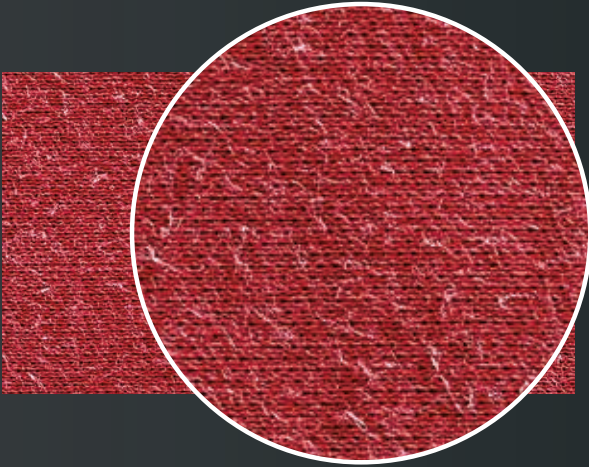

CARES TWICE AS EFFECTIVELY.*

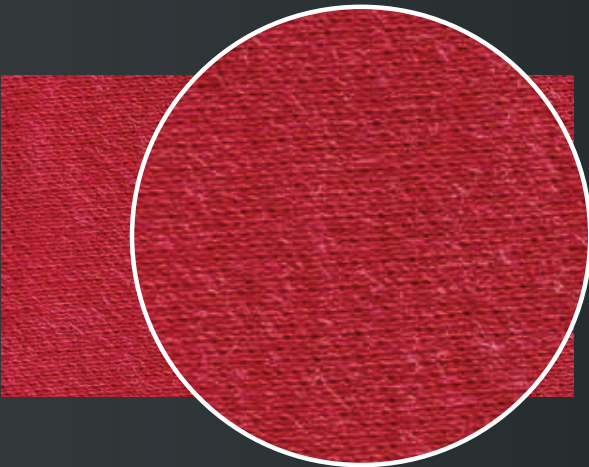

ProSense® Technology

Adjusts time, water and energy consumption to the size of the load, even if it is just a single shirt or your entire weekly wash. This is thanks to specific sensors that will intelligently control the cycle settings and take care that your clothes are only washed for the exact amount of time needed. This ensures that fabrics suffer less wear and tear, maintaining colour and texture for longer.

Available on 9000, 8000, 7000 and 6000 series washing machines.

Competitor
Fibres show more wear and tear due to unnecessary over-washing.

6000 Series with ProSense®
An optimised wash cycle results in less over-washing and less wear and tear.

Test institute: Ritex
Test fabric: Textile Interlok Multicolour Red-Blue-Black, Cotton 100%
Load size: 2kg
Programme: cotton 40°C

AWARD WINNING QUALITY.

Woolmark

The Woolmark Apparel Care programme helps consumers identify quality laundry appliances that are approved by The Woolmark Company for use on woollen fabrics.

Woolmark Blue

It is the Woolmark Apparel Care certification of wool cycles that identifies a machine as safe in which to wash handwash only woollen fabrics.

Woolmark Green

The gentleness required is exactly the same as for Woolmark Blue, but the programme uses less energy and water, hence the symbolic green labelling.

Ariel and Lenor certified

Our washing machine range is certified by Ariel and Lenor for their efficient use of liquid detergent and fabric softener. Any machine with ÖKOMix Technology has received the premium certification by Ariel and Lenor. The certification guarantees that 90% of fabrics in a washing load are evenly covered with liquid fabric softener. AEG, Ariel and Lenor have partnered to provide you with their combined unique care expertise for fabrics.

Quiet Mark

Quiet Mark is the international approval award programme that encourages companies worldwide to prioritise noise reduction within the design of everyday machines and appliances, and find solutions to noise problems.

“AEG gives consumers the confidence to put woollen garments into a machine, which has been lacking for the last 30–40 years.”

PETER ACKROYD
The Woolmark Company

WASHING MACHINES

While conventional washing machines need high temperatures to activate detergents and clean properly, the SoftWater Technology in AEG 9000 Series washing machines purifies and softens water before it enters the drum.

Softer water, kinder to clothes

Because our advanced SoftWater Technology purifies and softens water before it enters the drum, detergents can work much more effectively at low temperatures, delivering 60°C cleaning performance at only 30°C. So colours will keep their intensity wash after wash, and black won't fade to grey.

OUR TUMBLE DRYER RANGE

Our tumble dryer range is structured into 3 series levels. As you go up the series levels, our tumble dryers step up the level of fabric care, and include all the technologies from the series below.

	6000 SERIES	7000 SERIES	8000 SERIES
 AbsoluteCare® System			
 SensiDry® Technology			
 ProSense® Technology			

NO SHRINKAGE GUARANTEED.*

AbsoluteCare® System

Every fabric has specific characteristics and drying requirements. Tailored drying is needed to ensure they stay looking good for longer. The AbsoluteCare® System precisely controls the movement of the drum and the temperature of the drying for every type of fabric.

*Comparable with flat drying of wool.

Available on 8000 series
tumble dryers.

Outdoor Programme

Our new Outdoor drying programme is even better than air drying for waterproofed, breathable fabrics. It uses just the right amount of heat to restore the performance of the water-repellent membrane in waterproof clothing. This ensures your performance fabrics continue to perform.

SAFE LOW TEMPERATURES.

AEG SensiDry® Technology

SensiDry® Technology dries at almost half the temperature of conventional tumble dryers – reducing damage and wear, and maintaining the texture of your fabrics.

Available on 8000 and 7000 series
tumble dryers.

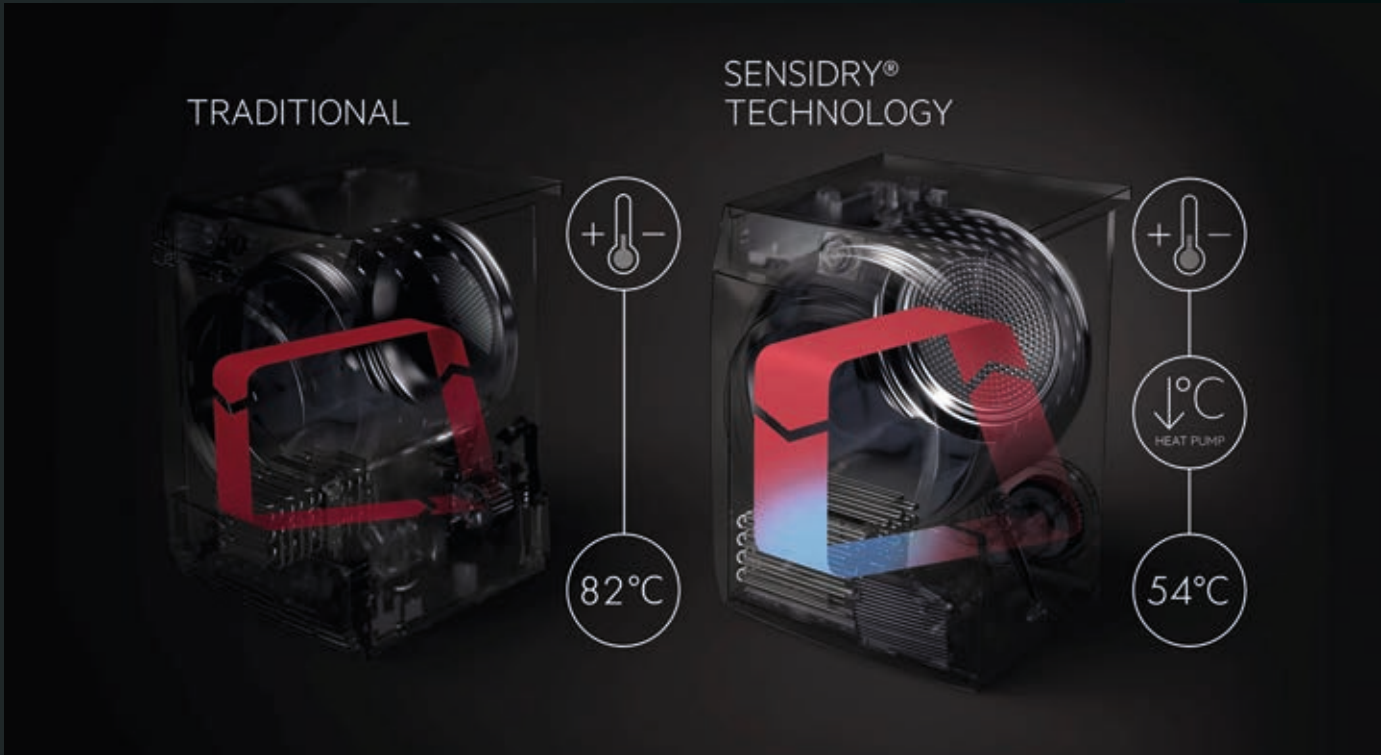

ProSense® Technology

AEG ProSense® Technology protects clothes from the wear and tear caused by over-drying. Advanced humidity and temperature sensors adjust the drying time and energy consumption to every load size, ensuring clothes are perfectly dried whilst also saving time and energy.

Competitor

AEG

TUMBLE DRYERS

Never dared to tumble dry wool, silk or outdoor garments before? Now you can tumble dry everything you wash. From the softest wool sweater to the business shirt you wear every day. Dryers with the AbsoluteCare® System. The tailored programming precisely controls the movement and temperature of the drying drum, so silks keep their shape and wrinkles are reduced.

OUR WASHER DRYER RANGE

We've taken the best technologies of our washing machines and tumble dryers and incorporated them into one solution, so you can wash and dry in one go.

WASHER DRYERS

With the same performance and technologies as two separate machines, you can wash and dry in one go.

We offer complete care for your woollens throughout the wash and dry cycle.

9000 SERIES

Delay start	

Colour: Stainless Steel fascia panel

Appliance Dimensions (HxWxD) in mm: 850 x 600 x 660

SensiDry®

SensiDry® Technology reduces the drying temperature by almost half (compared to a condenser washer dryer) – reducing damage and wear, and maintaining the texture of your fabrics.

DualSense®

DualSense® Technology tailors the temperature and motion of the drum to different fabrics. Everything from textured jackets to soft jumpers can be carefully washed, dried and cared for in one go.

ÖKOMix

The AEG ÖKOMix washer dryer is the only machine to pre-mix detergents and softeners separately in water before they enter the drum for the most thorough clean and the most even dry.

INSTALLATION DIAGRAMS

AEG has always been committed to supporting its retail partners and professional installers by providing them with best in class installation solutions. AEG kitchens are simple to install and use only one Torx T20 screwdriver to install all of our appliances, allowing installers to save time. In 2018, AEG launched a first of its kind Installer App, giving professional installers access to installation information at their fingertips.

NOTES

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

WARRANTIES

AEG appliances come with a 12 month warranty from date of purchase. When you register your new appliance your warranty will be extended to two or five years (depending on model). During your warranty period you are protected against the cost of parts, call-out and labour charges. All work is carried out by our national network of approved AEG engineers.

You can register your appliance by completing the warranty registration card enclosed with your appliance, calling our dedicated warranty registration phone number printed on the card, or online at **www.aeg.co.uk**

For additional peace of mind you have the option to extend your guarantee even further with our AEG Protection Plan. You'll be protected against damage caused by accident from the moment you join and if one of our approved engineers can't fix it, you could receive a brand new replacement. This coverage is provided by our specialist insurers Domestic and General.

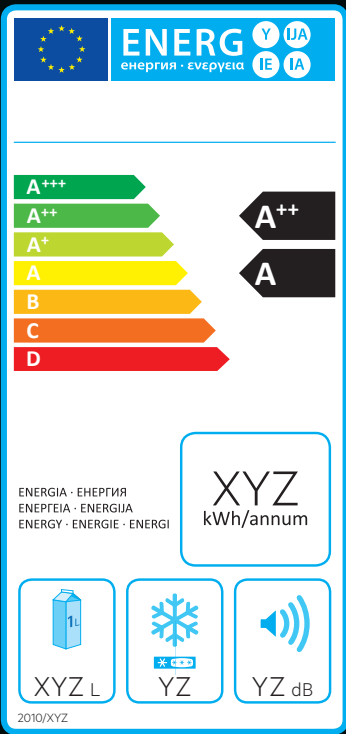

To find out more visit **www.aeg.co.uk**
or call **0800 479 0775**

ENERGY INFORMATION/ EU ENERGY EFFICIENCY INFORMATION

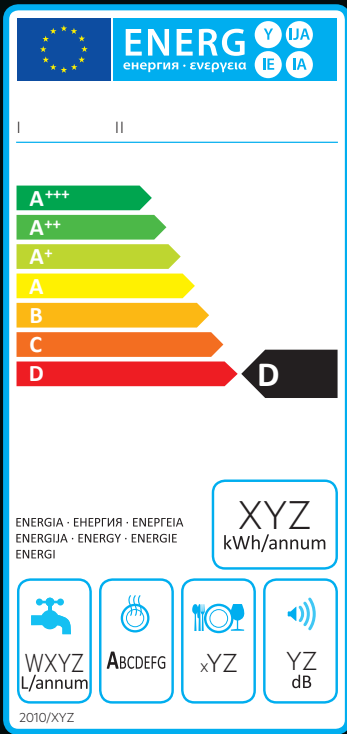

This scheme, which covers refrigerators, freezers, washing machines, tumble dryers, dishwashers and electric ovens is designed to offer consumers a standardised method of choosing the most energy efficient appliances.

For refrigerators and freezers, as well as stating the energy efficiency class (A+++ – most efficient, 'D' – least efficient) the label also gives the annual electricity consumption (i.e. running cost) freezing capacity, noise level and the usable storage capacity.

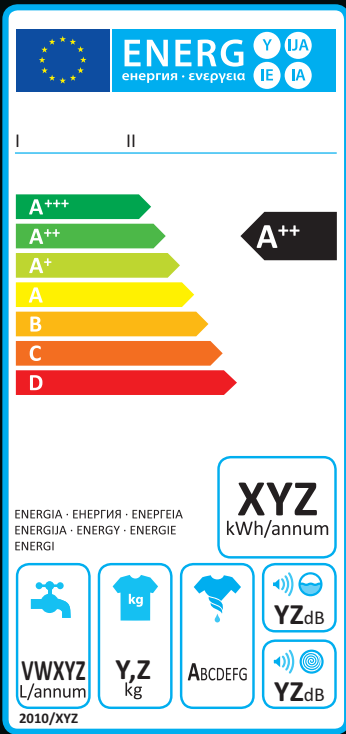

Example of refrigeration energy label.

For dishwashers, as well as stating the energy efficiency class (A+++ – most efficient, 'D' – least efficient) the label also states the annual water consumption (lts), drying efficiency, place settings and noise level.

Example of dishwasher energy label.

For washing machines, as well as stating the energy efficiency class (A+++ – most efficient, 'D' – least efficient) the label also states the annual water consumption (lts), load size (kg), spin speed efficiency and the washing & spinning noise levels.

Example of washing machine energy label.

For electric ovens, as well as stating the energy efficiency class ('A' – most efficient, 'G' – least efficient), the label also states the energy consumption (in kWh) and the usable volume of the oven. If the oven is a double oven it will carry this information for both ovens.

AEG has been creating pioneering appliances for the home for over 125 years. While others are catching up, we're moving further on, always an idea ahead. So if you want to know about true state-of-the-art technology, take a look inside.
